

SHRIMP SUPPLY CHAIN

Company List

CAL's field investigators heard reports of forced labor, child labor, and other exploitative labor practices and environmental harms in facilities owned by large and small shrimp companies in India. Shrimp from these companies enters the supply chains of major Indian shrimp exporters and large U.S. companies.

The following is an incomplete list of retailer names, brands, restaurants, and food service wholesalers in the United States connected to the Indian shrimp exporters through Indian export data, U.S. import bills of lading, Indian company websites, and other publicly available sources between 2021-2024:
